INSPECTION PERSONNEL WITH THE CREDENTIALS NECESSARY TO VERIFY COMPLIANCE WITH CUSTOMER & REGULATORY SPECIFICATIONS

Our dynamic staff of over 200 project managers, construction managers, engineers, environmental and regulatory specialists, designers, CADD operators, and inspectors consistently deliver quality work to our offshore accounts ranging from large diameter shallow water construction to ultra-deepwater field development pipelines.

PCS's foundation is rooted in engineering & consulting services, contributing to the installation of onshore & offshore pipeline, facilities, and equipment for over 20 years throughout North American, Gulf of Mexico & the rest of world.

AWS certified welding inspectors, NACE certified coating inspectors, API and ASME qualified inspectors, as well as ASNT rated inspectors.

Our inspection personnel have been involved in ultra deep water pipe lays, J-lay operations, directional drills, beach approaches, river crossings, high temperature, and H2S pipelines.
